Dr. Brenner

MICHAEL B. BRENNER, M.D., F.I.C.S.

Clinical Adjunct Professor, SCCO
Surgical Director, Presbyopic Services
Laser Vision Correction Specialist
TLC Laser Eye Centers® Torrance

EXPERIENCE ■ Dr. Brenner has performed over 20,000 LASIK and other refractive eye procedures over the last 20 years. Many southland physicians have trained with Dr. Brenner, greatly benefiting from his knowledge and unique patient management skills.

RECOGNITION ■ Dr. Brenner is a Fellow of both the International College of Surgeons and the American Academy of Ophthalmology. He is a regular contributing author and speaker of the American Society of Cataract and Refractive Surgery (ASCRS), the International Society of Refractive Surgery (ISRS), and the European Society of Cataract and Refractive Surgery (ESCRS). Dr. Brenner's academic affiliation with the Southern California College of Optometry as Clinical Adjunct Professor affords him the opportunity to shape the minds and broaden the learning experience of tomorrow's eye care professionals. . . a privilege in which he takes great pride.

TECHNOLOGY ■ Dr. Brenner currently serves as an FDA clinical investigator for new intraocular lens designs and maintains his position at the forefront of new refractive surgical procedures, including the surgical correction of presbyopia with the FDA approved accommodating Crystalens that may return near focus to aging vision. He utilizes additional lens technologies to improve reading vision without glasses including the ReSTOR®, ReZoom™, and Tecnis multifocal implants. Other techniques include NearVision CK (Conductive Keratoplasty), which may improve deteriorating reading vision without any cutting by carefully applying gentle radiofrequency pulses to the cornea. Patients who are not candidates for LASIK may benefit from other procedures including the implantable collamer lens (ICL) for correcting high myopia, and the use of Intacs for Keratoconus and Corneal Estasias.

EXPERTISE ■ Dr. Brenner also maintains a thriving referral based practice. He specializes in Anterior Segment Surgery in Long Beach which boasts a 40 year presence in the

area. Dr. Brenner is a fellowship-trained Cornea and Refractive Surgery Specialist having served as visiting Assistant Professor at the prestigious Jules Stein Eye Institute and Doris Stein Eye Research Center on the UCLA School of Medicine campus. All of his offices are equipped with the most advanced diagnostic technologies to analyze and interpret the optical performance and needs of each individual eye.

QUALITY CARE ■ Dr. Brenner applies his unique patient management skills in order to ensure each patient's success and satisfaction. Patients especially benefit from having total access to him in order to obtain answers to a very broad scope of all eye care related issues.

PERSONALIZATION ■ Most people do not even realize the opportunities available to them. Utilizing his vast teaching experience in refractive lens surgery, Dr. Brenner will custom tailor the best surgical approach to help you achieve your goals. He is one of the few U.S. surgeons certified to implant the Crystalens® accommodating lens, ReSTOR® Tecnis diffractive lenses, the multifocal Array® and ReZoom® intraocular lenses, Visian ICL (Phakic IOL), and many aspheric quality enhancing implants. For those better suited for corneal procedures, monovision LASIK, Advanced Surface Ablation, Intacs® segments, and NearVision CK are all options that can be explored addressing your personal visual requirements and lifestyle.

SAFETY ■ Ocular health is of the utmost importance in any vision correction procedure which is why Dr. Brenner's team of qualified professionals strive to provide patients with the latest and most advanced treatments while maintaining safety and quality control. Today's patients may benefit from "all laser" LASIK which Dr. Brenner performs with the IntraLase eliminating any cutting with a microkeratome blade.

TRUST ■ Those who know Dr. Brenner and manage patients with him appreciate his attention to detail and meticulous nature. Dr. Brenner takes pride in his ability to provide visual enhancement, preservation and restoration for his patients, family and friends. It is no wonder that Dr. Brenner garners an extremely high level of trust and confidence from his patients. . . he has even performed surgery on his own mother! He routinely operates on physicians and other health care professionals. Dr. Brenner has always been such a true believer in the technology that he has undergone Laser Vision Correction himself.

COMPASSION ■ The choice to have corrective eye surgery is not only an important decision in a person's life, but sometimes a difficult one as well. Dr. Brenner along with his caring staff are always by your side each and every step of the process. As a team, we will guide you through the surgical opportunities and alleviate any fear of the unknown through education and understanding.

Your procedure day is characterized by a warm and friendly environment highlighted by Dr. Brenner providing a great surgical experience. Following surgery, we are also there to assist in any way possible so that you may achieve your best quality of vision while maintaining ocular comfort.

CHOICE ■ We know you have a choice when it comes to eye surgery. As part of the TLC family, Dr. Brenner is able to utilize the latest state-of-the-art FDA-approved laser systems in choosing the most appropriate equipment tailored to meet your individual needs. He is experienced in multiple CustomLASIK platforms including the VISX S4 CustomVue with WaveScan utilizing Iris Registration tracking technology, LADARVision 6000 with LADARWave, and Allegretto's Wavelight Prolate System for higher levels of nearsightedness, farsightedness and astigmatism. Combined with the IntraLase FS60 guided "all-laser" LASIK, you can be sure that you are making the correct choice!
